PROJECT FACT SHEET

DELAWARE CANAL AT PAUNNACUSSING CREEK, LUMBERVILLE, BUCKS COUNTY, PA

April 2005

CONGRESSIONAL INFO: Sen. Santorum PA, Sen. Specter PA, Rep. Fitzpatrick PA-08.

ACTIVITY: Plans & Specifications

TYPE: Streambank Stabilization

AUTHORITY: Section 14, 1946 Flood Control Act (P.L. 79-526) as amended.

LOCATION: The area is located along the Delaware River in the vicinity of Paunacussing Creek in Bucks County, Pennsylvania. Stream erosion is threatening the retaining wall and tow path along the historic Delaware Canal.

STUDY/PROJECT DESCRIPTION: This is an emergency stream bank stabilization study. The Delaware River is eroding its banks and threatening the Delaware Canal. The Pennsylvania Department of Conservation and Natural Resources has expressed interest in being the non-Federal sponsor for this project.

STUDY/PROJECT STATUS: Site surveys and analysis of design alternatives were completed. Plans & Specifications are being finalized. Construction of the project may begin after completion of the plans & specifications and the final environmental assessment. Construction would last approximately four to six months. .

FINANCIAL DATA:
(\$000)

Est. Fed Cost:	\$1,040
Est. Non-Fed Cost:	\$560
Total Est. Cost:	\$1,600

BUDGET DATA:
(\$000)

FY04	\$50
FY05	\$75

ENVIRONMENTAL STATUS: A Draft Environmental Assessment has been prepared. It must be circulated to the public and outside agencies for review & comment.

SPONSOR: Pennsylvania Department of Conservation and Natural Resources

PROJECT MANAGER: Bill Mulloy
